Macros

- KDE4_ADD_APP_ICON
 - Adds icon on Windows.
 - Converts PNG to ICO-file.

Exports

- Adds symbol to lookup table.
- Everything is exported by default on Linux.
- Most often seen compilation error.

Dependencies

- C++-libraries might not compile using MSVC.
- Plain-C libraries compiled using MinGW can be used with MSVC.
- Autotools-based dependencies now supported (beta).

Communication

- Get your application tested
- Adding dependencies or changing their minimum version
