STOP!!!!

Did you notice the **FREEDOMS** we've granted you?

Our copyright license is **different!** It grants freedoms rather than just imposing restrictions like all those other textbooks you probably own or use.

- We know people copy textbooks illegally but we would LOVE it if you copied our's - go ahead copy to your hearts content, **legally!**
- Publishers' revenue is generated by controlling the market, we don't want any money, go ahead, distribute our books far and wide - we DARE you!
- Ever wanted to change your textbook? Of course you have! Go ahead, change ours, make your own version, get your friends together, rip it apart and put it back together the way you like it. That's what we really want!
- Copy, modify, adapt, enhance, share, critique, adore, and contextualise. Do it all, do it with your colleagues, your friends, or alone but get involved! Together we can overcome the challenges our complex and diverse country presents.
- So what is the catch? The only thing you can't do is take this book, make a few changes and then tell others that they can't do the same with your changes. It's share and share-alike and we know you'll agree that is only fair.
- These books were written by volunteers who want to help support education, who want the facts to be freely available for teachers to copy, adapt and re-use. Thousands of hours went into making them and they are a gift to everyone in the education community.

| 8 Thermal Properties and Ideal Gases - Grade 11 | 125 |
| 8.1 A review of the kinetic theory of matter | 125 |
| 8.2 Boyle's Law: Pressure and volume of an enclosed gas | 126 |
| 8.3 Charles's Law: Volume and Temperature of an enclosed gas | 132 |
| 8.4 The relationship between temperature and pressure | 136 |
| 8.5 The general gas equation | 137 |
| 8.6 The ideal gas equation | 140 |
| 8.7 Molar volume of gases | 145 |
| 8.8 Ideal gases and non-ideal gas behaviour | 146 |
| 8.9 Summary | 147 |
| 9 Organic Molecules - Grade 12 | 151 |
| 9.1 What is organic chemistry? | 151 |
| 9.2 Sources of carbon | 151 |
| 9.3 Unique properties of carbon | 152 |
| 9.4 Representing organic compounds | 152 |
| 9.4.1 Molecular formula | 152 |
| 9.4.2 Structural formula | 153 |
| 9.4.3 Condensed structural formula | 153 |
| 9.5 Isomerism in organic compounds | 154 |
| 9.6 Functional groups | 155 |
| 9.7 The Hydrocarbons | 155 |
| 9.7.1 The Alkanes | 158 |
| 9.7.2 Naming the alkanes | 159 |
| 9.7.3 Properties of the alkanes | 163 |
| 9.7.4 Reactions of the alkanes | 163 |
| 9.7.5 The alkenes | 166 |
| 9.7.6 Naming the alkenes | 166 |
| 9.7.7 The properties of the alkenes | 169 |
| 9.7.8 Reactions of the alkenes | 169 |
| 9.7.9 The Alkynes | 171 |
| 9.7.10 Naming the alkynes | 171 |
| 9.8 The Alcohols | 172 |
| 9.8.1 Naming the alcohols | 173 |
| 9.8.2 Physical and chemical properties of the alcohols | 175 |
| 9.9 Carboxylic Acids | 176 |
| 9.9.1 Physical Properties | 177 |
| 9.9.2 Derivatives of carboxylic acids: The esters | 178 |
| 9.10 The Amino Group | 178 |
| 9.11 The Carbonyl Group | 178 |
| 9.12 Summary | 179 |

| | |
|--|------------|
| 10 Organic Macromolecules - Grade 12 | 185 |
| 10.1 Polymers | 185 |
| 10.2 How do polymers form? | 186 |
| 10.2.1 Addition polymerisation | 186 |
| 10.2.2 Condensation polymerisation | 188 |
| 10.3 The chemical properties of polymers | 190 |
| 10.4 Types of polymers | 191 |
| 10.5 Plastics | 191 |
| 10.5.1 The uses of plastics | 192 |
| 10.5.2 Thermoplastics and thermosetting plastics | 194 |
| 10.5.3 Plastics and the environment | 195 |
| 10.6 Biological Macromolecules | 196 |
| 10.6.1 Carbohydrates | 197 |
| 10.6.2 Proteins | 199 |
| 10.6.3 Nucleic Acids | 202 |
| 10.7 Summary | 204 |
| | |
| III Chemical Change | 209 |
| | |
| 11 Physical and Chemical Change - Grade 10 | 211 |
| 11.1 Physical changes in matter | 211 |
| 11.2 Chemical Changes in Matter | 212 |
| 11.2.1 Decomposition reactions | 213 |
| 11.2.2 Synthesis reactions | 214 |
| 11.3 Energy changes in chemical reactions | 217 |
| 11.4 Conservation of atoms and mass in reactions | 217 |
| 11.5 Law of constant composition | 219 |
| 11.6 Volume relationships in gases | 219 |
| 11.7 Summary | 220 |
| | |
| 12 Representing Chemical Change - Grade 10 | 223 |
| 12.1 Chemical symbols | 223 |
| 12.2 Writing chemical formulae | 224 |
| 12.3 Balancing chemical equations | 224 |
| 12.3.1 The law of conservation of mass | 224 |
| 12.3.2 Steps to balance a chemical equation | 226 |
| 12.4 State symbols and other information | 230 |
| 12.5 Summary | 232 |
| | |
| 13 Quantitative Aspects of Chemical Change - Grade 11 | 233 |
| 13.1 The Mole | 233 |
| 13.2 Molar Mass | 235 |
| 13.3 An equation to calculate moles and mass in chemical reactions | 237 |

| | |
|--|------------|
| 13.4 Molecules and compounds | 239 |
| 13.5 The Composition of Substances | 242 |
| 13.6 Molar Volumes of Gases | 246 |
| 13.7 Molar concentrations in liquids | 247 |
| 13.8 Stoichiometric calculations | 249 |
| 13.9 Summary | 252 |
| 14 Energy Changes In Chemical Reactions - Grade 11 | 255 |
| 14.1 What causes the energy changes in chemical reactions? | 255 |
| 14.2 Exothermic and endothermic reactions | 255 |
| 14.3 The heat of reaction | 257 |
| 14.4 Examples of endothermic and exothermic reactions | 259 |
| 14.5 Spontaneous and non-spontaneous reactions | 260 |
| 14.6 Activation energy and the activated complex | 261 |
| 14.7 Summary | 264 |
| 15 Types of Reactions - Grade 11 | 267 |
| 15.1 Acid-base reactions | 267 |
| 15.1.1 What are acids and bases? | 267 |
| 15.1.2 Defining acids and bases | 267 |
| 15.1.3 Conjugate acid-base pairs | 269 |
| 15.1.4 Acid-base reactions | 270 |
| 15.1.5 Acid-carbonate reactions | 274 |
| 15.2 Redox reactions | 276 |
| 15.2.1 Oxidation and reduction | 277 |
| 15.2.2 Redox reactions | 278 |
| 15.3 Addition, substitution and elimination reactions | 280 |
| 15.3.1 Addition reactions | 280 |
| 15.3.2 Elimination reactions | 281 |
| 15.3.3 Substitution reactions | 282 |
| 15.4 Summary | 283 |
| 16 Reaction Rates - Grade 12 | 287 |
| 16.1 Introduction | 287 |
| 16.2 Factors affecting reaction rates | 289 |
| 16.3 Reaction rates and collision theory | 293 |
| 16.4 Measuring Rates of Reaction | 295 |
| 16.5 Mechanism of reaction and catalysis | 297 |
| 16.6 Chemical equilibrium | 300 |
| 16.6.1 Open and closed systems | 302 |
| 16.6.2 Reversible reactions | 302 |
| 16.6.3 Chemical equilibrium | 303 |
| 16.7 The equilibrium constant | 304 |

| | | |
|-----------|---|------------|
| 16.7.1 | Calculating the equilibrium constant | 305 |
| 16.7.2 | The meaning of k_c values | 306 |
| 16.8 | Le Chatelier's principle | 310 |
| 16.8.1 | The effect of concentration on equilibrium | 310 |
| 16.8.2 | The effect of temperature on equilibrium | 310 |
| 16.8.3 | The effect of pressure on equilibrium | 312 |
| 16.9 | Industrial applications | 315 |
| 16.10 | Summary | 316 |
| 17 | Electrochemical Reactions - Grade 12 | 319 |
| 17.1 | Introduction | 319 |
| 17.2 | The Galvanic Cell | 320 |
| 17.2.1 | Half-cell reactions in the Zn-Cu cell | 321 |
| 17.2.2 | Components of the Zn-Cu cell | 322 |
| 17.2.3 | The Galvanic cell | 323 |
| 17.2.4 | Uses and applications of the galvanic cell | 324 |
| 17.3 | The Electrolytic cell | 325 |
| 17.3.1 | The electrolysis of copper sulphate | 326 |
| 17.3.2 | The electrolysis of water | 327 |
| 17.3.3 | A comparison of galvanic and electrolytic cells | 328 |
| 17.4 | Standard Electrode Potentials | 328 |
| 17.4.1 | The different reactivities of metals | 329 |
| 17.4.2 | Equilibrium reactions in half cells | 329 |
| 17.4.3 | Measuring electrode potential | 330 |
| 17.4.4 | The standard hydrogen electrode | 330 |
| 17.4.5 | Standard electrode potentials | 333 |
| 17.4.6 | Combining half cells | 337 |
| 17.4.7 | Uses of standard electrode potential | 338 |
| 17.5 | Balancing redox reactions | 342 |
| 17.6 | Applications of electrochemistry | 347 |
| 17.6.1 | Electroplating | 347 |
| 17.6.2 | The production of chlorine | 348 |
| 17.6.3 | Extraction of aluminium | 349 |
| 17.7 | Summary | 349 |
| IV | Chemical Systems | 353 |
| 18 | The Water Cycle - Grade 10 | 355 |
| 18.1 | Introduction | 355 |
| 18.2 | The importance of water | 355 |
| 18.3 | The movement of water through the water cycle | 356 |
| 18.4 | The microscopic structure of water | 359 |

| | | |
|-----------|---|------------|
| 18.4.1 | The polar nature of water | 359 |
| 18.4.2 | Hydrogen bonding in water molecules | 359 |
| 18.5 | The unique properties of water | 360 |
| 18.6 | Water conservation | 363 |
| 18.7 | Summary | 366 |
| 19 | Global Cycles: The Nitrogen Cycle - Grade 10 | 369 |
| 19.1 | Introduction | 369 |
| 19.2 | Nitrogen fixation | 369 |
| 19.3 | Nitrification | 371 |
| 19.4 | Denitrification | 372 |
| 19.5 | Human Influences on the Nitrogen Cycle | 372 |
| 19.6 | The industrial fixation of nitrogen | 373 |

|--|------------|
| 21.5 Mining and Mineral Processing: Gold | 401 |
| 21.5.1 Introduction | 401 |
| 21.5.2 Mining the Gold | 401 |
| 21.5.3 Processing the gold ore | 401 |
| 21.5.4 Characteristics and uses of gold | 402 |
| 21.5.5 Environmental impacts of gold mining | 404 |
| 21.6 Mining and mineral processing: Iron | 406 |
| 21.6.1 Iron mining and iron ore processing | 406 |
| 21.6.2 Types of iron | 407 |
| 21.6.3 Iron in South Africa | 408 |
| 21.7 Mining and mineral processing: Phosphates | 409 |
| 21.7.1 Mining phosphates | 409 |
| 21.7.2 Uses of phosphates | 409 |
| 21.8 Energy resources and their uses: Coal | 411 |
| 21.8.1 The formation of coal | 411 |
| 21.8.2 How coal is removed from the ground | 411 |
| 21.8.3 The uses of coal | 412 |
| 21.8.4 Coal and the South African economy | 412 |
| 21.8.5 The environmental impacts of coal mining | 413 |
| 21.9 Energy resources and their uses: Oil | 414 |
| 21.9.1 How oil is formed | 414 |
| 21.9.2 Extracting oil | 414 |
| 21.9.3 Other oil products | 415 |
| 21.9.4 The environmental impacts of oil extraction and use | 415 |
| 21.10 Alternative energy resources | 415 |
| 21.11 Summary | 417 |
| 22 The Atmosphere - Grade 11 | 421 |
| 22.1 The composition of the atmosphere | 421 |
| 22.2 The structure of the atmosphere | 422 |
| 22.2.1 The troposphere | 422 |
| 22.2.2 The stratosphere | 422 |
| 22.2.3 The mesosphere | 424 |
| 22.2.4 The thermosphere | 424 |
| 22.3 Greenhouse gases and global warming | 426 |
| 22.3.1 The heating of the atmosphere | 426 |
| 22.3.2 The greenhouse gases and global warming | 426 |
| 22.3.3 The consequences of global warming | 429 |
| 22.3.4 Taking action to combat global warming | 430 |
| 22.4 Summary | 431 |

Part I

Introduction

you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections A and A above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

1. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.
2. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.
3. State on the Title page the name of the publisher of the Modified Version, as the publisher.
4. Preserve all the copyright notices of the Document.
5. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.
6. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.
7. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.
8. Include an unaltered copy of this License.
9. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.

10. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the “History” section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.
11. For any section Entitled “Acknowledgements” or “Dedications”, Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.
12. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.
13. Delete any section Entitled “Endorsements”. Such a section may not be included in the Modified Version.
14. Do not re-title any existing section to be Entitled “Endorsements” or to conflict in title with any Invariant Section.
15. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version’s license notice. These titles must be distinct from any other section titles.

You may add a section Entitled “Endorsements”, provided it contains nothing but endorsements of your Modified Version by various parties—for example, statements of peer review or that the text has been approved by an organisation as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section A above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled “History” in the various original documents, forming one section Entitled “History”; likewise combine any sections Entitled “Acknowledgements”, and any sections Entitled “Dedications”. You must delete all sections Entitled “Endorsements”.

COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an “aggregate” if the copyright resulting from the compilation is not used to limit the legal rights of the compilation’s users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section A is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document’s Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section A. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled “Acknowledgements”, “Dedications”, or “History”, the requirement (section A) to Preserve its Title (section A) will typically require changing the actual title.

TERMINATION

You may not copy, modify, sub-license, or distribute the Document except as expressly provided for under this License. Any other attempt to copy, modify, sub-license or distribute the Document is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <http://www.gnu.org/copyleft/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License “or any later version” applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation.

ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

Copyright © YEAR YOUR NAME. Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.2 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled “GNU Free Documentation License”.

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the “with...Texts.” line with this:

with the Invariant Sections being LIST THEIR TITLES, with the Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.
